MICROSOFT REVEALS EXCLUSIVE GAMES AND NEW PROPERTIES FOR THE UPCOMING XBOX ONE

icrosoft Corporation thrilled fans and energized millions of viewers with news of Xbox One details, new games, and exclusive titles.

When Microsoft revealed its new console in May, the company focused on the hardware itself and its myriad new features, like the advanced Kinect motion and volce sensing bar, and a built-in digital video recorder (DVR) for capturing and sharing gameplay footage. Monday's event strongly focused on what fans can expect to play on the console at launch – and well into 2014. "It's all about the games," said Don Mattrick, Microsoft's president of Interactive Entertainment Business.

The company also unveiled a release window and price: The Xbox One will

ELECTRONIC ARTS LOOKS TO THE FUTURE

n the Electronic Arts E3 2013 press conference, special guest Kyrie Irving of the Cleveland Cavaliers pro basketball team said that to succeed, NBA players need "freedom, creativity, control." That statement applies just as well to making great games – and EA offers gamers all three of these crucial ingredients, thanks to its two powerful new game engines, the EA Sports Ignite and the Frostbite 3.

These engines were the backbone of EA's presentation, showing new games with clarity, dynamism, beauty, and realism. First on the Frostbite 3 roster was Plants vs. Zombies: Garden Warfare, which was introduced via a tongue-in-cheek, Battlefield-inspired trailer. This third-person action game features a hilarious four-player co-op survival mode, wherein players assume the roles of the series' trademark Peashooter. Chomper.

launch in 21 worldwide territories in November, priced at \$499. €499, and £429 for various regions. Gamers can now pre-order a special edition Xbox One Day One console, which includes an exclusive controller design and a commemorative Achievement.

Games commanded the bulk of the focus at the briefing, kicking off with a lengthy look at Metal Gear Solid V: The Phantom Pain from Konami. Slated for release on Xbox One, the latest entry in the stealth-action franchise shifts to an open-world setting, with the footage showing grizzled hero Snake, also known as Big Boss, riding a horse through an Afghani desert, as well as using stealth skills to evade armed guards.

Ryse: Son of Rome also featured heavily in the presentation. Set in Ancient Rome, Ryse is an Xbox One exclusive, launching alongside the console. Created by Crytek (Crysis), Ryse will launch on Xbox One to take advantage of the nextgen console's advanced hardware capabilities. "I've been searching for a way to make this game for a long time," said Crytek president and CEO Cevat Yerli, following a gameplay demo that showed dazzlingly frantic sword-based combat and strategic troop formations.

Next up, Microsoft's Forza

Motorsport 5 got an in-depth presentation. Developer Turn 10 revealed a feature called "Drivatar," which learns from players' racing tendencies and creates computer-controlled counterparts that appear in other users' races. The prototype McLaren P1 supercar appeared on the stage - only two currently exist - with the same vehicle shown in-game for comparison. Forza 5 will be available at the Xbox One's launch, and is playable alongside Ryse: Son of Rome on the E3 show floor.

Microsoft demonstrated numerous exclusive titles that will appear on the Xbox One postlaunch, including the revival of the fan-favorite Killer Instinct fighting game series. Original creator Rare is co-developing the game with Double Helix, and the gameplay footage showed familiar fighters trading classic moves. Microsoft also announced that Kinect Sports Rivals, a new entry in Rare's motion-based series, will be available this November for Xbox One.

Ted Price, president and CEO of Insomniac Games, took the stage to debut a trailer for Sunset Overdrive, a vibrant open-world shooter that marks the studio's first exclusive game for an Xbox console. "It's something that we could only do on Xbox One," said Price.

In addition, developer Mojang will deliver the indie sensation Minecraft: Xbox One Edition, with larger maps and additional multiplayer options. Microsoft also showed gameplay footage from D4 - an episodic adventure series from Hidetaka "Swery65" Suehiro, creator of eccentric fare like the cult-favorite Deadly Premonition.

Remedy Entertainment unveiled an in-game clip from Quantum Break, an action game tied to a companion TV series. Also featured was Crimson Dragon - a third-person shooter that puts players on the back of a giant dragon. It is set to debut exclusively on Xbox One from developers Grounding and Land Ho.

Microsoft hopes to ignite Xbox One and Windows 8 users' creativity with Project Spark, a game-creation suite that lets users generate and share their own original games. Voice commands are used to quickly create environments, and deeper control options allow for even more fine-tuned

game Max: The Curse of Brotherhood and Namco Bandai's 2014 epic Dark Souls II closed out the Xbox 360 portion of the show.

Microsoft promised that hundreds of games are set to release on the Xbox 360 console in the coming years, and underscored this with the revelation of a newly redesigned version of the Xbox 360 - available immediately.

Ultimately, the Xbox One was the star of the show, and Microsoft drove the point home with a trio of exclusive, triple-A games. First up was Dead Rising 3, the latest open-world zombie-slaving title from Capcom's Vancouver studio. The polished gameplay footage showed new hero Nick Ramos eliminating undead opponents in a California town using various custom-built weapons that he created on the spot.

Microsoft's own blockbuster Halo first-person shooter franchise returns in 2014 with a brand-new Xbox One entry. A teaser trailer

customization. Players can also tweak and play their friends' created games.

After a brief demo of Capybara Games' Xbox One-exclusive game Below, Microsoft announced that it has invested in five new studios to create original games for Xbox One, and aired a clip from a currently untitled action game in development by Black Tusk Studios. Following this, the creators of Battlefield 4 (EA) and The Witcher 3: Wild Hunt (CD Projekt RED) showed off the hotly anticipated Xbox One versions of each.

Microsoft also debuted several new titles for the Xbox 360, which continues to thrive nearly eight years after its launch. World of Tanks: Xbox 360 Edition launches this summer as a free-to-play game, bringing Wargaming.net's multiplayer PC favorite to the home console. Trailers for Press Play's upcoming platform-action

was shown to whet fans' appetites. The publisher revealed that this upcoming Halo installment will be the series' first console entry to run at a smooth 60 frames-persecond. It is also set to feature dedicated multiplayer servers, enhanced by cloud technology.

The press conference closed out with a brand new franchise: Titanfall, a multiplayer-centric FPS developed by Respawn Entertainment and published by Electronic Arts, coming spring 2014. The game is exclusive to both Xbox consoles and Windows 8, and the footage (shown running on Xbox One) depicted a chaotic battlefield in which soldiers - both on-foot and piloting massive mechs waged war for supremacy.

Titanfall - along with the rest of Microsoft's exciting lineup - is sure to drive interest in the Xbox One as it prepares to launch worldwide this November.

Sunflower, and Cactus plants. In EA's demonstration, four players fended off marauding zombies with a remote-controlled garlic bulb drone and exploding bok choy. The lighthearted zombie romp culminated in a two-part fight against a boss called the Disco Zombie, whose specialty consisted of swinging a sparkling (and dangerous) disco ball. Plants vs. Zombies: Garden Warfare is set for release on Xbox One and Xbox 360.

After this, EA demonstrated its intense new sci-fi shooter, *Titanfall*. Developed by Respawn Entertainment and due in spring 2014 for Xbox 360, Xbox One, and PlayStation 4, *Titanfall* focuses on combat between hightech, agile, single-soldier mech vehicles called Titans. The excitement continued with a teaser trailer for a new game from *Battlefield* developer DICE. The trailer initially showed a snowy landscape, which was suddenly

developer BioWare's *Dragon Age* series, *Dragon Age III: Inquisition*. Set for release in fall 2014 (with platforms still unannounced), the game promises a deep, provocative, and thoroughly gorgeous faritasy experience.

At this point, EA focused on the new EA Sports Ignite engine and next-gen titles in development for it. Andrew Wilson, head of EA Sports, presented NBA Live 14 with special guest and pro basketball player Kyrie Irving. The duo showed off some of the Ignite engine's capabilities, such as naturalistic player movement and new "bounce tech" that separates the ball from physics. The technologies combine to create an exceptionally realistic and responsive gameplay experience for the upcoming Xbox One and PlayStation 4 title.

Next up was Madden NFL 25, coming out August 27 for Xbox 360 and Sony PlayStation 3. Cam

EA's lineup would never be complete without a celebration of its recent partnership with Ultimate Fighting Championship (UFC), EA Sports UFC, due in spring 2014 for the Xbox One and PlayStation 4, was introduced by UFC president Dana White, UFC lightweight champion Benson Henderson, and UFC light heavyweight champion Jon Jones. The game features a new system that allows fighters to organically alter their strategies during the fight and feel the punches like never before, thanks to new full-body physics technology.

After the sports game talk, EA pumped up the crowd even more by announcing what could very well be the most high-profile incarnation of the Frostbite 3 engine, Battlefield 4. Magnus Troedsson, general manager of Battlefield developer DICE, said the game features what he called "Levolution" - the next level of chaotic multiplayer combat. DICE demonstrated just how amazing Battlefield 4 looks with a live 64-player demo. Following a specific team onscreen, the view began in a helicopter hovering over a gleaming cityscape. As the soldiers landed, broken water mains spouted and rubble fell as the team sustained heavy fire. The squad made its way through a subway, destroyed a city street from below (and disabled a tank

in the process), and headed up into a high-rise.

From the top floor, the team fought off tanks and helicopters, shooting from blown-out windows. When things got too hot, they leaped from the building floated to the street, and turned just in time to see the building they had occupied toppled to the ground by missile fire. In addition to this level of visceral combat, Battlefield 4 features a new Commander mode, which allows one team member to get a bird's eye view of the action and coordinate the team's efforts. The game also features a social network called the Battle Log, which allows players to interact with the game at any time and from any place, from a range of (as yet unspecified devices.

Before wrapping things up, EA hat the audience with one final surprise: After years of fan demand, DICE is developing a new Mirror's Edge game. EA teased the title with a brief trailer and promised that the game is "coming when it's ready."

With the freedom, creativity, and control of its new game engines powering a slate of high-impact titles, EA is poised to take the next generation of index games by storm.

interrupted by the stomp of a mechanical walker, and ended with the cheer-inducing logo for Star Wars: Battlefront.

Heading back for more Earthbound territory, EA next showed the upcoming street racer Need for Speed Rivals, and featured special guest Aaron Paul - best-known for his role on the hit television show Breaking Bad, and slated to star in the Need for Speed film (coming to theaters spring 2014). As a gamer himself, Paul enthusiastically introduced EA's heart-pumping racing game. A brief two-player demo began with a rain-soaked road and a sleek red Ferrari. Midway through the race, a second player entered the game, thanks to its AutoDrive feature (which allows seamless transitions between single-player and multiplayer).

After Need for Speed, EA kept the excitement high with a brief trailer for the third installment in Weber, EA's general manager of American football, touted the game's True Step technology – which allows more precise footwork and more control. Additionally, the new "Player Sense" feature lets players to react even more believably to events as they happen. As Weber said, "Madden has never felt so real."

FIFA 14 - also powered by the Ignite engine - promises players the same kind of ultra-realism as Madden NFL 25 and NBA Live 14. Pop music star Drake took EA's stage to introduce FIFA 14's Pro Instincts and Elite Technique systems, which respectively increase in-game characters' intelligence and help them to better emulate soccer's best players. In addition to incredible fidelity of movement, FIFA 14 also features huge "living" stadiums filled with cheering fans who respond realistically to the game as it unfolds. FIFA 14 debuts this fall for Xbox One and PS4.

SUNFLEX USA PRESENTS UNU AT E3 2013

REVOLUTIONARY DEVICE IS A TABLET, SMART TV, AND GAME CONSOLE - ALL IN ONE

ombining the simplicity of an Android tablet with the power of a smart TV, plus the fun and versatility of a game console might seem all but impossible. But at E3 this year. Sunflex USA LLC proves it can be done at with its all-new unu device. What makes the unu possible are its three key peripherals: the docking station, the "air mouse," and the unu game controller.

On its own, the unu functions as a portable tablet, which is based on Google's Android operating system and offers access to apps from the Google Play store. When coupled with

the supplied TV docking station, the unu transforms into a smart TV receiver, allowing users access to their favorite smart TV applications, such as Netflix. In addition, the innovative "alr mouse" remote control lets users navigate the unu's TV menus easily and quickly, as if they were maneuvering a PC mouse in mid-air.

While docked, the unu also delivers the user's entire library of Android games onto the big screen. Taking advantage of its simple-to-use proprietary gaming controller, unu users can enjoy their favorite games with the visual and sound

quality of their televisions. For gamers looking to bridge the gap from the touchscreen interface to the immersive experience of

the console, unu offers a whole new game experience. The unu will be available for purchase in summer 2013.

MMO GAME CHANGERS: DEFIANCE, ARCHEAGE

eeping millions of online gamers entertained is a huge undertaking, and holding onto subscribers requires constantly devising new ways to engage players. It may sound formidable, but with its two new massively multiplayer online games, Trion Worlds makes it look easy.

First on the bill is Defiance, Trion's groundbreaking game-slash-television series. This multimedia hybrid takes viewers and players to a futuristic world where humanity must fight a ruthless alien race. The game and the Syfy Channel companion show progress in parallel, and since the April launch, fans have enjoyed the TV show's wild west-style melodrama and the game's dynamic world events. Later this year, extra content for Defiance hits the boards with a new playable race, a new siege mode, species changing

conortunities, and three new Monolith Arkfall events.

Next up is ArcheAge, published by Trion and created by Lineage creator Jake Song. Traditionally, MMOs control how players experience them, but ArcheAge lets players enjoy the game in whatever manner they choose. This fantasy-themed sandbox gives players total control over where they go, what they do, and who they are. A North American release date has not been announced, but a successful South Korean release in January suggests it should be arriving online in the US soon.

Within the show business-like competitiveness of online games, few MMOs even get a callback. Fortunately for Trion, its demonstrated knack for creating compelling content that keeps gamers coming back for more is likely to make it a star.

FOCUSING ON FUN

SHERLOCK HOLMES PLUS THREE NEW SERIES SHINE IN FOCUS HOME INTERACTIVE'S LINEUP

ocus Home Interactive offers a new chapter in its long-running Sherlock Holmes series at E3 2013. The newly released PC game Crimes & Punishments: Sherlock Holmes is the first game in the series to see players actively take on the role of the consulting detective, rather than observing Holmes' investigative process. Eight new cases and 12 possible endings mean that many story options await players.

Also coming later in 2013 for Play-Station 3, Xbox 360, and PC is Bound by Flame, a role-playing game set in a world ravaged by war between humans and undead. In this title, the player takes control of a human possessed by a demon of fire, and must either struggle to keep his own humanity or allow the incredible power of the demon to take over.

Next up this fall, Focus Home Interactive's Magrunner is an action-puzzle game set in 2050 and inspired by the tales of famed horror writer H.P. Love-craft. Players come into possession of the Magtech glove, a device which allows them to infuse objects in the game world with electromagnetic charge. Using this ability, players can attract and repel various objects to solve puzzles and progress through the game's exciting science-fiction storyline. Magrunner is set for release on Xbox Live, PlayStation Network, and PC.

Finally, Focus Home Interactive is showing ObsCure, a new take on the popular sidescrolling game from 2004. Later this year (on PlayStation Network, Xbox Live, and PC), ObsCure tests players' battling abilities as they face off against a horde of horrific monsters, alone or cooperatively with up to three friends. With four new games from four completely different genres, Focus Home Interactive offers E3 attendees an action-packed lineup for the upcoming year and beyond.

FINANCIAL REPORTING FACES DIGITAL DILEMMA

The process of managing inventory, returns, sell-in, and sell-through is well understood when it comes to physical goods in the video game industry. With the advent of in-app purchases, downloadable content, and digital returns, this process has become convoluted. The large number of online retailers, fragmenting platforms, and emerging business models create compex scenarios that only add to the business of already stretched internal managing and cense payments back to be access and third parties.

O en the last two years EEDAR has become the ideo game industry's most account of a sales data processing

partner, with active agreements supporting over a dozen of the world's top publishers.

DIGITAL SALES DATA
REQUIRES COMPLEX
PROCESSING SYSTEMS
AND ACCURATE METADATA

"EEDAR digital sales management delivers more accurate information to finance departments faster and more cost effectively than internal resources can produce alone," said Greg Short, CEO of EEDAR. "In addition, our comprehensive auditing controls ensure peace of mind in relation to the security, timeliness and accuracy of the data clients receive."

DIGITAL SALES ARE A
GROWING CHALLENGE FOR
FINANCE AND ROYALTY TEAMS.

Sales data will continue to become more fragmented as digital video game consumption expands. Addressing the many edge cases in revenue recognition, product bundles, discounting, taxation and royalty reporting require both domain expertise and extensive product identity and metadata systems. Simply throwing man power at the problem is no longer cost-effective.

"It is inevitable that the digital video game industry will see increased financial complexity for the foreseeable future," Short added. "By continuing to work closely with publishers and major accounting firms, EEDAR is helping to shape much needed best practices and standards, while providing a reliable – and affordable – data infrastructure to augment the operations of finance departments around the world."

Michael D. Gallagher President and CEO, ESA

Interview with ESA CEO

MIKE GALLAGHER

What is the Entertainment Software Association, and what is its role in the industry?

The ESA is the U.S. trade association representing companies that publish computer and video games on all platforms, including consoles, personal computers, handheld devices, smart phones, tablets, and the Internet. Our members include virtually all of the top entertainment software companies.

Our organization provides insight, knowledge, and assistance to these companies to help them navigate today's complex marketplace, enabling them to advance their objectives and achieve their goals. We also represent our industry on a variety of issues, from First Amendment advocacy to intellectual property protection, and work to foster economic conditions that support our growing industry.

Last year, we saw E3 excive with new exhibitors, such as mobile gaming companies, joining the event. What would you say the "state of E3" is coming into the 2013 event?

Coming into E3, I can say that the event is at its strongest. We are coming off a great showing in 2012 that welcomed new innovations in the mobile and console space. E3 continues to be the premier video game expo in the world.

This year, we will be welcoming in a new generation of video games, embracing new ideas from the mobile market, and giving a spotlight to up-and-coming game designers through our E3 College Competition. We are very excited to add that competition to our expo. While the best in the

industry will be showing off exciting new innovations, we also wanted to be able to give a stage to the next generation of game designers.

We will also continue to showcase video games as a mass market medium. Regardless of what type of screen you want to play video games on - handheld, television, phone, tablet, or console - there will be a wealth of content on display for all types of gamers.

What trends do you think attendees will observe at this year's E3?

I think this year, we are going to see how the mobile and console spaces can come together to provide shared entertainment experiences, as well as generate new ideas to be shared across both platforms.

We have already begun to see tablets and phones connect to consoles, as well as social networks that are specifically built into games and consoles. With new hardware on the horizon, it will be exciting to see how traditional consoles will work with new mobile devices to provide unique gaming experiences.

This cross-platform integration shows you how diverse the industry has become in terms of delivering video game content.

In the past, you needed a television and a console to play games. Now every person with a phone is holding a gaming device, which means almost anyone can be a gamer. That person can also be connected to a variety of video game platforms, through social gameplay and integration.

With the recent excitement around the next-gen consoles, and the buzz around social and mobile games, how and where do you see the game space evolving in the next five years?

There is room for both game spaces to exist and potentially contribute to each other's success. Ideas from the mobile space are already finding their way into home consoles through tablet controllers and touchscreen integration.

On the mobile side, console franchises are finding new homes – and audiences – on the mobile market, and gameplay styles from consoles are also finding a place on mobile devices. Mobile gaming will once again have a major presence at E3, and the importance of that sector is only going to continue growing.

Mobile games are no longer just associated with "casual" gamers, and have changed the way we view games and those who play them. E3 2013 reflects this trend, as some of the top mobile game designers will attend and exhibit at the expo. In addition, upand-coming developers are cutting their teeth in the mobile market, which leads to opportunities with the biggest publishers.

Social media continues to be a major part our culture. How has the continued rise in social media affected the video game industry?

The continued growth of social media and games has continued to introduce entertainment software to wider audiences. It has also enabled video game companies to reach millions of consumers instantly at a much lower cost than before.

Today, more Americans than ever play video games. The large majority of game players are adults, and adult women represent a greater portion of the game-playing population than boys 17 or younger. In addition, an increasing number of gamers report that they play with other gamers in person or with their families.

Industry leaders are producing an ever-expanding variety of games in formats that are accessible across these social platforms.

Some of these companies also incorporate tools into their games and consoles that enable gamers to connect with others through social networks to share information, commentaries, reviews, and recommendations. We've even seen companies create entirely new social networks solely for the purpose of using them on home consoles, mobile devices, or PCs.

Interview with ESA CEO

MIKE GALLAGHER

...continued

In the months leading up to E3, media violence has been in the national dialogue. What has the ESA done in response?

Since the media violence debate began in late 2012, we have had a major role in defending the industry against accusations that video games cause real-world violence.

The truth is, video games are a positive part of American culture. Nearly every American plays video games on a variety of products. The Entertainment Software Rating Board (ESRB) is the gold standard for content ratings, and numerous scientific studies find no connection between video games and real-world violence. We have been a part of various high-profile meetings, and made major announcements to Illustrate these facts.

In January, the ESA had a meeting with Vice President Joe Biden, where we explained that video games are a positive part of American culture with many social and economic benefits, and educated him on the ESRB ratings system. Following that meeting, we began to work on a PSA campaign to further educate parents about the ESRB's ratings, and this effort was received with acclaim from members of both major political parties. In March, the Federal Trade Commission's retail undercover shopper results found that U.S. video game retailers were the highest amongst entertainment industries, in terms of ratings enforcement.

In short, the ESA is committed to defending the industry and actively educating policymakers and stakeholders about video games' beneficial and positive contributions.

Last year, a major story ne rus ng E3 was the uncertainty that E3 would return to Los Angeles. The show is back at the Los Angeles Convention Center this year, but where is the future of the expo?

It is here in Los Angeles.

Last July, we announced that E3 will stay in the city through 2016. Because of the vibrancy of this industry and this trade show, we had many options available to us. However, we came to an agreement that ensured E3 would stay in its traditional home – and we are committed to that.

Video games are a dominant force in the global entertainment marketplace, and there is no better place to display that than Los Angeles. We look forward to continuing our relationship with the city.

What do you hope attendees will take away from this year's event? With so many new announcements rumored for this show, where should they be focusing their attention?

My first advice to attendees looking to get the most out of E3: Wear comfortable shoes! There are more than 300,000 square feet of innovations on display, and I encourage attendees to explore them all.

E3 has a lot to offer. We will be showcasing the most technologically advanced and compelling entertainment experiences in the world. We want attendees to take away the sense of excitement, wonder, and anticipation that comes with experiencing cutting-edge entertainment and getting a taste of what is yet to come.

READY FOR ACTION

505 GAMES' DIGITAL ACTION AIMS TO THRILL

ith its sights set on downloadable releases across multiple platforms, 505 Games lines up a trio of action games for this E3 that spotlight very different settings and objectives, yet all aim to immerse players within exciting scenarios.

Payday 2 is the sequel to 2011's hit PC and PlayStation 3 (via PlayStation Network) cooperative shooter Payday: The Heist. This new title adds the Xbox 360's Xbox Live Arcade to its list of destinations. As in the original release, piayers take the role of one of four criminals engaged in a thrilling

heist. Each mission utilizes a number of randomized elements to eliminate predictability and ensure that no two attempts are ever exactly the same. Players must work closely with their comrades to complete objectives, ward off attackers, and successfully finish each job.

Payday 2 packs in an array of fresh gameplay features -- most notably, a "Crimenet" contract database that is frequently updated with new missions, letting players choose their own paths through the criminal underworld. Players can pick different professions with

varying perks, as well as upgrade and modify their characters. Adding to the excitement, completed missions now award rare and beneficial loot in the form of weapon modifications and masks. The sequel also includes longer, multi-stage missions, allowing even more opportunities for entertaining turmoil. Developed by Swedish studio Overkill Software, Payday 2 infiltrates all three platforms later this summer.

Staying alive amidst a chaotic scenario is also the goal in 505 Games' new action-adventure game How to Survive. Set on four islands full of zombies, the game's title refers to a survival guide provided to characters stuck in this treacherous tropical locale, which adds a humorous edge to the action. Adding to the zombie-survival fun, the game includes multiple playable lead characters, offering distinct abilities for each.

Key to the How to Survive gameplay experience is an expansive crafting system that lets players merge together vanous items to create weapons, tools, and other helpful objects. Players will need all the help they can get against the undead enemies that pop up

in both the light of day and eerie evening darkness. How to Survive hails from French developer EKO Software, and will be released digitally on Xbox 360, PlayStation 3, Nintendo Wii U, and PC (via Valve's Steam platform) this fall.

Also due out this fall is Takedown: Red Sabre, a tactical military shooter that challenges players to work within a squad, with missions that reward deliberate and considered play rather than run-and-gun chaos. Takedown halls from Serellan, a new development team headed by Christian Allen, the former creative director of Ubisoft's Tom Clancy's Ghost Recon series. Slated for digital release on Xbox 360 and PC through Steam, Takedown allows players a wide array of options when tackling objectives, as it simulates the real-life skills and abilities of S.W.A.T. teams and Soldier of Fortune groups.

Whether robbing banks, surviving tropical island zombie uprisings, or executing precise military tactics, 505 Games' three digital releases all look to turn heads on the E3 show floor with unique, action-packed scenarios and exciting gameplay.

REALMS REIMAGINGED

SQUARE ENIX TAKES BELOVED FRANCHISES INTO THE FUTURE

his year at E3, Square Enix reinvents some of its most popular franchises for the newest platforms, remixes gaming legends in exciting new ways, and showcases fantastical new realms of fun in Final Fantasy.

The revered Thief franchise sneaks back into the limelight thanks to developer Eidos Montreal. This first-person stealth adventure puts players in the cloak of Garrett, a master brigand. Amidst the pervasive corruption of the game's pre-industrial city, Garrett uncovers shocking -- and potentially deadly -- secrets. Players enjoy a huge amount of freedom in movement and puzzlesolving capabilities, allowing them to skillfully harness the shadows of the underworld. Thief heads to PC. PlayStation 4, and Xbox One

Square Enix's massively popular Kingdom Hearts series is coming back as well. With its unique collaboration between Square Enix and Disney, Kingdom Hearts has charmed millions of players since its 2002 debut. In fall 2013, the Kingdom Hearts HD 1.5 ReMIX collection brings the formerly Japan-exclusive Kingdom Hearts Final Mix and Kingdom Hearts Re: Chain of Memories to the PlayStation 3 with beautiful high-definition playability.

The wildly popular Final Fantasy X and Final Fantasy X-2 are coming to the PlayStation 3 and PlayStation Vita this year, offenng HD graphics that will wow longtime and new fans allike. The garnes tell the story of Tidus and Yuna, who must save the land of Spira from a monster that hails from beyond the bounds of reality. Final Fantasy X/X-2 HD Remaster will be available later this year as a single disc

release on PlayStation 3, and as two separate cards or downloads for the PlayStation Vita.

Another magical Final Fantasy world is also about to be transformed. Final Fantasy XIV: A Realm Reborn is a massive upgrade to the multiplayer online role-playing game. Featuring stunning new graphics and gameplay, A Realm Reborn transforms the land of Eorzia into a fresh new world for players to explore. The game is rebuilt from the ground up, delivering an exciting new experience to enchant

both veterans and newcomers. The revamped Final Fantasy XIV will come to PC and PlayStation 3 this year.

Rounding out the Final Fantasy showcase is Lightning Returns, the concluding chapter in the Final Fantasy XIII saga. It combines open-world, action-driven exploration with Final Fantasy's strategic role-playing. Later this year, Play-Station 3 and Xbox 360 gamers will see favorite characters in new roles and a world transformed, as a clock ticks down to destruction.

THE SOULS OF HEROES

NAMCO BANDAI GAMES DELIVERS EXPLOSIVE CROSSOVERS, FAVORITE CHARACTERS, AND A TOUCH OF DARKNESS

ore than three recordbreaking decades after its first arcade hits, Namco Bandai Games America Inc. continues to produce innovative, engaging games that delight and entertain a broad audience.

The critically acclaimed Dark Souls sold millions at retail and earned numerous awards from the press. The game's combination of incredible visuals, Intense challenge, and carefully designed gameplay created a classic, Its legion of fans crave more, so Namco Bandai and developer From Software have teamed up again to create Dark Souls II. This highly anticipated sequel delivers the engaging gameplay, extensive customization, and notonous challenges that veterans have come to love, while revamping the presentation to invite more new players into the fold on PlayStation 3, Xbox 360, and PC.

But high fantasy is not the only genre that game fans can look forward to exploring. Armored Core: Verdict Day is the latest installment in a futuristic robot-piloting simulation franchise. Players take control of a massive, customizable robot—or, alternatively, act as an "Operator" to lead a squad of up to 20 mechs to success in online or offline play. Armored Core: Verdict Day arrives on Xbox 360 and Play-Station 3 later this summer.

Some players just want to save the entire world from ruin. For those players, Namco Bandai offers fans a new title in the hit Tales role-playing game series, Tales of Xillia. Taking control of heroes Jude and Mila, players explore a beautiful fantasy setting, meeting helpful friends and devious foes while engaging in action-packed battles and exploring puzzling dungeons. Tales of Xillia will be released exclusively for the PlayStation 3 on August 6.

If saving one world is not enough, how about several dozen? Hitting stores on June 26 is *Project X Zone*, a 3DS-exclusive strategy game that combines more than 50

fan-favorite game characters from Namco Bandai, SEGA of America, Inc., and Capcom USA, Inc. In a crossover of unprecedented scope. Fans can look forward to seeing characters from series like Namco Bandai's *Tekken* team up with characters from titles like Capcom's Devil May Cry and SEGA's Valkyna Chronicles in a strategy gamer's dream come true.

Licensed games continue to play a key role in Namco Bandai's strategy. Power Rangers MEGA-FORCE, based on the children's TV series, comes to the 3DS this fall with camera functionality allowing players to scan official Morpher Cards for power-ups. Namco Bandai also expands its downloadable offerings later this summer with One Piece Pirate Warriors 2 — a zany, colorful PlayStation Network-exclusive title based on the mega-hit Japanese comic One Piece.

Finally, Namco Bandai's most familiar face returns in fine form. Based on the upcoming animated series of the same name, Pac-Man and the Ghostly Adventures brings the beloved yellow dot-champer to the PlayStation 3, Xbox 360, Wii U, and PC this fall. In addition, classicminded gamers will look forward to this fall's Pac-Man Museum, a downloadable title coming to PC. PlayStation Network, Xbox Live Arcade, and the Nintendo eShop. This special set includes Pac-Man, Pac-Man Champion Edition, and the four-player Pac-Man Battle Royale. Finally, the previously released Pac-Man Championship Edition DX for Windows 8 PC, Xbox Live, and PlayStation Network will receive a content update in the form of Pac-Man Championship Edition DX Plus.

From modern classics to history, dark fantasies to colorful mazes, Namco Bandai Games offers plenty to enjoy for any gamer,

TECMO KOEI JUMPS INTO THE FRAY

CYBORG NINJA, WARRIORS, AND DEMONS HEADLINE E3 LINEUP

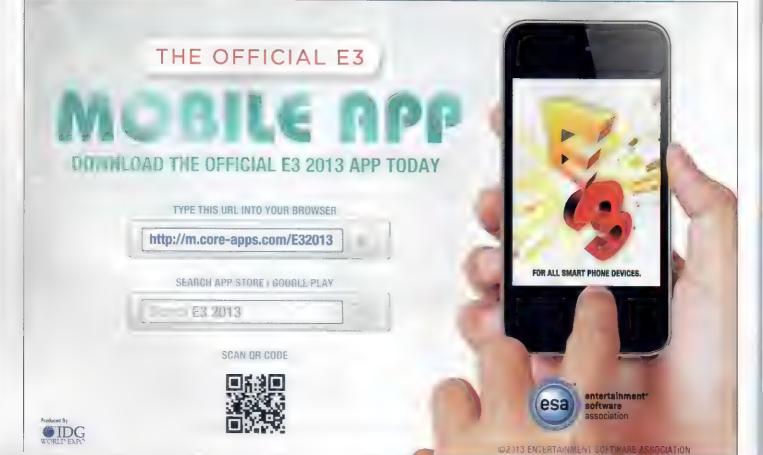

ense, over-the-top, and action-packed, Yaiba: Ninja Gaiden Z headlines Tecmo Koei America Corporation's robust E3 2013 lineup. As the titular cyborg ninja, players use their transformable cybernetic arm, ninja weapons, and even the limbs of their zombie foes as deadly weapons. The title's heavily stylized, graphic-novelesque visuals emphasize the visceral, pulse-pounding gameplay — while unique features in the design ensure that Yaiba will be enjoyable for both core gamers and a broader audience when it hits stores in 2014.

Dynasty Warriors 8 (which arrives at retail on July 12) is the latest chapter in the popular tactical-action series. Featuring online and offline cooperative gameplay, as well as an enhanced story mode, Dynasty Warriors 8 lets players experience historical combat like no other.

In addition, the renowned Dead or Alive series returns this fall with the high-intensity Dead or Alive 5 Ultimate, wherein players experience the biggest lineup of fighters in DOA history, with new online options making fights even easier to come by.

Tecmo Koei's showing at E3 also features Atelier Meruru Plus: The Apprentice of Arland, the highly anticipated final game in the Arland trilogy of role-playing/alchemy simulation hybrids. In addition, the company offers a sneak peek at Toukiden, a demon-slaying action game for PlayStation Vita, in trailer form. Both games are due out later this year.

With titles featuring a range of iconic characters and pulse-pounding genres, Tecmo Koei's 2013 lineup is one of the company's most exciting showings at E3 to date.

FAST PASS TO FUN

DISNEY INTERACTIVE TAKES PLAYERS TO INFINITY AND BEYOND

Isney Interactive is experiencing a golden age. The studio has become a creative hotbed of interactive entertainment ideas, the most anticipated of which may be the franchise-blending *Disney Infinity*.

Disney Infinity Is an imaginative, multi-franchise action game that blurs the line between fantasy and reality. Using a real-life item called the Disney Infinity Base, players power up real-world Disney/Pixar action figures like Captain Jack Sparrow, Mr. Incredible, and Sulley, and insert them into unique virtual worlds called Play Sets. Characters can swap Play Sets, and up to four players can jump into them. The fun starts with the Disney Infinity Starter Set, which comes with three Play Sets (The Incredibles, Pirates of the Caribbean, and Monsters Inc.), a game disc, a Disney Infinity Base, three action figures, a Power Disc, and web codes to unlock online content.

Cars is the only additional Play Set confirmed to date, but John Vignocchi, executive producer at Disney Interactive, has this to say about the game's future development: "One of the great things about Disney Infinity is that it was designed to be an ongoing platform for Disney stories, past, present, and future. Choosing the

right characters and brands is a tremendous privilege and responsibility, and one that we take very seriously."

In addition to letting players bland their favorite Disney experiences, Disney Infinity also allows them to create their own. The game's open-world Toy Box mode gives players a set of intuitive tools to help them invent, play, and share their own Disney-themed adventures. Even better, these creations can be shared cross-platform, "The Disney Infinity interactive game pieces are platform-agnostic, A character that comes with a Wii U starter pack will also work on the PlayStation 3 version," Vignocchi says. The Disney Infinity adventure begins August 18, with its release on Xbox 360, PlayStation 3, PC, Wli, Wii U, and 3DS.

Disney Interactive's E3
Inneup this year also includes the gravity-defying Disney's Planes, a high-flying action adventure game based on the animated film of the same name. Taking off August 6, the game features the voice talents of Val Kilmer, Dane Cook, and Anthony Edwards, and treats players to a range of fun minigames and story-based adventures that soar beyond the film's plot. Disney's Planes is available exclusively for the Nintendo Wii, Wii U, 3DS,

and DS. It offers piatform-specific perks such as two-player drop-in/ drop-out on console, and a special Challenge mode available only on handheld platforms.

Third in Disney Interactive's lively line-up is Fantasia: Music Evolved. Made by music game experts Harmonix Music Systems Inc. and available exclusively for Xbox 360 Kinect, this musical motion game lets players step into Mickey Mouse's classic role of Sorcerer's Apprentice. Neophyte music mixers will use the Kinect's

unique motion controls to remix and augment tunes from more than 30 chart-topping artists like Bruno Mars, AVICII, Fun, and Kimbra. The magical, musical world of Fantasia: Music Evolved shimmers into view in 2014.

Disney Interactive's games offer a special kind of magic that transports gamers beyond the everyday. This year, that Disney magic blends reality with real-world action figures to create brand-new adventures, climb to higher altitudes, and conduct the music of the stars.

WORKING MIRACLES

EXTRA LIFE MARATHON—GAMERS HELPING KIDS

ames have the power to entertain, to teach, and to bring families together, but as former game blogger Jeromy "Doc" Adams knows, they also have the power to heal. In 2008, Adams started Extra Life, a 24-hour game marathon benefiting the Children's Miracle Network Hospitals (CMN). Since then, Extra Life has become an annual event that has raised over \$4 million dollars to date.

Extra Life began in memory of Tori Enmon, a brave, video-game-loving girl with acute lymphoblastic leukemia. Her story inspired gamers in the United States and Canada to set aside one day a year to game around the clock and raise money for their local CMN hospitals. "Torl's legacy is that the joy of gaming and the opportunity to save and improve kids' lives can be one and the same, Adams says. "Extra Life allows gamers of all kinds to shine as heroes for sick and injured kids right in their community." Historically, each participating gamer has raised an average of \$200, and these funds have allowed hospitals to perform research, purchase equipment, and provide kids like Tori with exemplary care.

This year, Extra Life ups the ante by asking gamers to spend 25 hours playing their favorite games and asking supporters to pledge at least \$1 per hour. The event takes place Saturday, November 2, 2013 - but individual participants may also choose their own second date and can break the marathon into two separate, shorter sessions. As Adams puts it, "We want to give gamers the online tools, support, and encouragement they need, then get out of the way so they can raise funds and play games however they want: individually, as groups, by geographical location, or by gaming interest."

Interested gamers can register for free on Extra Life's official website (www.extra-life.org) or they can upgrade to the \$15 Platinum option. The latter makes them eligible to receive an official 2013 Extra Life Tshirt upon raising a minimum of \$200. All participants also receive a benefit at tax time, since all donations are tax-deductible.

Extra Life is open to all kinds of gamers and all kinds of games; genre and platform are unimportant. What is important is bringing the gaming community together to have fun and to raise money for some very brave kids.

HANDHELD HEROICS

NATSUME GIVES MOBILE GAMERS NEW WAYS TO SAVE THE DAY

rom hometowns to mystic worlds, Natsume Inc. has a varied E3 2013 product lineup that lets gamers save the day – right in the palms of their hands. First, this fall Harvest Moon creator Yasuhiro Wada transforms gamers into hometown heroes with time-management/simulation game Hometown Story. The game allows players to work to save a failing business while the game's simulation mechanics make the customer base (and its surrounding village) change, depending on the gamer's decisions. Hometown Story will be avallable for iOS and the Nintendo 3DS.

Next up is the cool-retro style roleplaying game Mystic Chronicles. Starting this summer, a young hero can save the world with the help of his friends and their powerful Guardian Beasts. Beasts come in defensive, offensive, and healing varieties, and can be mixed and matched among party members. Mystic Chronicles is planned as a digital download for the Sony PlayStation Portable. From mystics to monsters, the heroics continue with Natsume's two action-strategy games for iOS, both due out this summer. In Gabrielle's Sweet Defense, Monsterville comes under attack by humans gone mad for sweets. In Gabrielle's Zombie Attack the onslaught continues, pitting the heroine against the living dead.

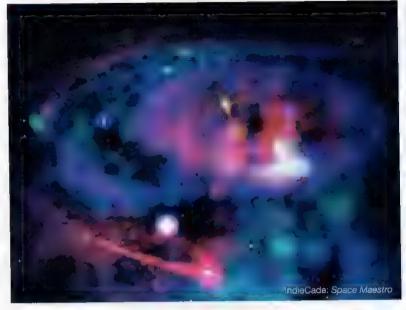

Things stay hot on iOS with Natsume's Ninja Climb, as players join a ninja band in order to save a town being held under the thumb of an evil magistrate. The opportunity for heroics then takes an aquatic turn in Real Fishing Pocket, a fishing simulator that features 20 different fish, 60 pieces of tackle, and 90 challenging missions. Both Ninja Climb and Real Fishing Pocket will be available this summer.

Whether to save their store, their town or their world, Natsume's 2013 lineup offers gamers their choice of exciting opportunities to demonstrate their skill – and reveal their inner hero.

INDIECADE, VIDEOGAME HISTORY MUSEUM, AND PRO VS. GI JOE ADD DIVERSITY TO E3'S EVENTS

PLAY GAMES WITH SMALLER DEVS OR TAKE ON THE TROOPS

ig-name developers, publishers, and manufacturers of Inventive peripherals are not the only ones who make E3 such a rich experience. A huge diversity of events takes place within the show itself. Those who are interested in peeking back through the industry's history or taking a closer look at the creativity and innovation going on in the indie sector are in luck — both are on full display during E3 2013.

In the Videogame History Museum (South Hall booth #2723), attendees can expect to see a classic video arcade, game stations to play original systems, and several "Ilving room" setups to make the retro experience all the more complete. The Videogame History Museum is one of the only museum organization dedicated solely to video games. scurrent archive consists of ower 50,000 items, including video games, computer games, handheld

games, and memorabilia, as well as design documents, test reports, hardware designs, and Internal memos. This year the Museum will be celebrating the history of the first third-party console publisher, which goes by the name Activision Blizzard, Inc. these days.

Moving into the present day, fans can observe and compete in Call of Duty against US troops fighting overseas in Afghanistan and beyond at the Pro vs. GI Joe event (South Hall booth #2535). Retired Mexican-American mixed martial artist and former UFC Light Heavyweight Champion Tito Ortiz is scheduled to act as the on-hand pro for the competition. Ortiz is scheduled to appear at the Pro vs. GI Joe booth all day today.

The Pro vs. GI Joe event also showcases some unusual hardware: the MEGS. MEGS stands for Mobile Entertainment Gaming System, "a portable, self-contained and highly durable multimedia platform created to give our troops endless hours of fun and relaxation." They can be opened, say, on the back of a Humvee in the middle of Afghanistan, to let troops play and practice Call of Duty for competitions like the ones taking place all during E3 2013.

The booth, sponsored by Gearbox Software, also boasts live music from chiptune artist 8-bit Weapon and freestyle MC/rapper Mega Ran.

For something on the cutting edge of contemporary, IndieCade's Showcase at E3 (South Hall booth #3035) is worth exploring. Industry insiders at the IndieCade showcase are always the first to see the year's most interesting independent games and industry trends.

As Festival Chair Celia Pearce noted, IndieCade celebrates diversity in games, showing a wide selection of works that Illustrate what games are capable of being "Most of these games defy neat little genre and marketing compartments," said Pearce. "They redefine play and games, and give us a glimpse into the future."

IndieCade visitors also get access to the games' passionate designers and creators who are on-hand to take questions and field interviews. Since 2007, IndieCade's Showcase has featured close to 30 certified hits (like Antichamber. Skulls of the Shogun, and Cards Against Humanity), and countless others that have attracted devoted followings. And now, E3 2013 attendees have a chance to count themselves among the

earliest of early adopters. The 2013 IndieCade showcase includes the cooperative IOS party game Spaceteam, an interactive Kinect experience titled Space Maestro, an interactive musical comedy game called Dominique Pampiemousse in "it's All Over Once The Fat Lady Sings", and a Jenga-meets-table-top-shuffleboard puzzler known as Tower No Tumble.

E3 DEBUTS INAUGURAL COLLEGE GAME COMPETITION

TALENTED STUDENT DEVELOPERS IN THE SPOTLIGHT AT E3

his year's E3 will showcase the inaugural E3 College Game Competition, which is aimed at recognizing the best student talent in video game development. More than 400 U.S. colleges and universities with computer and video game development programs had a chance to submit their work, with five finalists selected by the jury to showcase their games at E3 2013.

"We were extremely impressed with the array of talent demonstrated by the E3 college competition submissions, and our finalists represent the most promising and innovative submissions as determined by industry veteran judges," said Rich Taylor, senior vice president of communications and industry affairs at the Entertainment Software Association. "Our goal is to nurture the next generation of industry talent, and our finalists earned their place

among the stellar lineup of top industry companies that will unveil exciting news and products at E3."

Taking top honors are: Alamo Colleges-Northwest Vista College, Brigham Young University, Savannah College of Art and Design, University of Chicago, and University of Wisconsin-Stout. In order to be considered, competing schools were required to submit a playable game, plus story details and relevant content assets.

The selection process included vetting by a distinguished judging panel led by Michael D. Gallagher, president and CEO of the ESA, and included leaders from across the video game industry, including: Kazuhlko Abe (president and CEO, Capcom); Laurent Detoc (president, Ubisoft); Christopher Grant (editorin-chief, Polygon); Lou Kesten (video game reviewer, Associated

Press); Matias Myllyrinne (CEO, Remedy Entertainment); Jake Solomon (lead designer, Firaxis); and Noah Hughes (creative director, Crystal Dynamics).

"This sterling lineup represents some of the best and most respected talent in our field, and we are grateful for their support," said Taylor. "Encouraging and recognizing academic talent is key to our industry's future, and the ESA is pleased to honor outstanding student achievement and to provide these students with a well-deserved spotlight at E3."

The finalists will have the opportunity to mingle with top game industry figures including publishers, developers, venture capitalists, and marketing executives. The five colleges, their winning games and student developers can be found at booth #2835 in the South Hall.
